SHORT TERM STAY

Saint Ann's Home offers an alternative program as a means of accelerating the healing process for individuals in need of short term medical care. Short term care bridges the gap between a required hospital stay and returning home.

At Saint Ann's Home, the patient receives professional clinical and therapeutic care designed to meet the individual needs of each patient. Our focus is on care with dignity, rapid recovery alternatives, medical and staff expertise in post-acute care, and peace of mind for the individuals and their families Saint Ann's Home prides itself on its' atmosphere of peace and caring.

REASONS YOU WILL LOVE SAINT ANN'S

Saint Ann's invites you to participate in our Short Term Care program if you have had a stroke, heart attack, frequent falls, joint replacement or recent surgery and are in need of temporary medical and / or therapeutic stay.

Our concern for your well being is reflected through our presentation of up-to-date medical application, staff who are educated to your needs, dietary application, and a stress-free and peaceful environment for your healing.

Our goal is to have you rehabilitated and back into an active mode of living in your home. We invite you to learn about us and our newest program for utilizing and maximizing the life that you have.

COME JOIN US AT SAINT ANN'S HOME

Our focus is your return to good health and your safe return to your home.

Our physicians and staff fully understand that your needs as a short term care resident are unique to you. You will have the latest in therapeutic care equipment and a highly qualified staff.

Our Short Term Care Program addresses the concerns and rehabilitation of recipient of joint replacement.

Our staff is trained to recognize that falling is NOT a natural subsidy of aging. We address:

- Your fear of falling
- Your diet
- Your balance
- Vision
- Ability to turn while walking.

These are vital to restabilizing your mind and body to functioning on a normal daily basis.
